

Current Lake Level Readings

Jul 18, 2016

Notice: Current lake level send based on 7/15 readings

The current gage reading is 9.35 compared to 9.6 at the end of June. The DNR prescribed gage reading for this month is between 8.5 and 9.0

Boards: 2 removed 7/8 but debris is accumulating on the grates which reduces the effective flow.

Rain since July 1 is 1.3 inches which is near to the average for this time of year.

Sevastopol continues to monitor the precipitation and flood potential and will adjust the boards and clean the grates as needed.

Next report will be sent in two weeks.
