

Bird Survey
Jun 04, 2016

Please Help find our feathered friends

Attention all Clark Lake residents. Please read the following request for assistance concerning a DNR survey of birds. Volunteers such as Jan are conducting this survey and they need both access to observation sites and assistance from other birders to have a complete and accurate count. Please **also enlist others not on the lake but in the surrounding area to assist.**

The Wisconsin Breeding Bird Atlas Survey II is a 5 year project that documents birds breeding everywhere in Wisconsin. The last survey was completed about 10 years ago. You can find more information about this project on line; just Google Wisconsin Breeding Bird Atlas. I have been assigned a 3 square mile area that is called Jacksonport CW, so you can see the area I must cover.

If you are a land owner in this area, have good bird habitat, and would like to participate in any way, please call me. Perhaps, I could come out to bird there or give you a little lesson so you can report your own sightings on the data submission page. At this time I have not done any work on any Clark Lake property or the Lake Michigan beach included in this block. But I am finding many breeding birds in the places I have surveyed.

My email is jane.wrede@gmail.com and phone number is [920 743-4391](tel:9207434391).

I hope to hear from you.

Thanks,

Jan Wrede
