

Dam and Lake Levels

Nov 21, 2016

Dam and lake levels

The gage reading at the dam on 11/16 is 8.4 (permit 8.5-9.0). 5 boards and the horizontal fish grate are all removed for a 6 board equivalent. All of the new, larger grid and easier cleaning grates are now installed. Sevastopol has been cleaning the debris frequently, mostly by two volunteers of its park and dam committee. The permit level beginning on Dec 15 is 8.3-8.5 so Sevastopol will not be adding any boards back for now

Unless there is unusual rain between now and ice in, there should not be much shoreline damage this winter.
