

## Lake Levels Due to Decrease

Sep 13, 2016

### Notice: Lake Levels due to decrease

Sevastopol has notified us that they will be removing a board this week and letting the lake level drop from the current 9.32 to about 9.0 over the next few weeks. Boaters should be aware that they may have difficulty recovering larger, longer and deep draft boats when the level is in the 9.0 range. You should plan to remove these craft now before the level falls too far.
