

CLAA Natural Shoreline project

General Goals for each owner :

- **Minimum 35 foot vegetative buffer from ordinary high water mark or wetlands.**
- **Limit or replace riprap with biologic material and/or plant with absorptive plants.**
- **Limit viewing corridor to 35 feet.**
- **Plan acceptable access corridor both on land and in the water. (current county ordinance is a pedestrian access corridor of up to 60 inches wide.)**
- **Populate the vegetative buffer zone with a mixture of trees, bushes and native plants**
- **Leave woody debris in the water/ install Fishsticks**
- **Eliminate use of fertilizer on lawns**
- **Preserve/ renew near shore emergents, esp. bulrush**
- **Ensure septic systems monitored and maintained**
- **Limit insults to all water less than 5 foot depth from boating, hunting or other recreational use**
- **Monitor for and eliminate invasive species**
- **Reduce run off by limiting impervious surface, using rain gardens or other mitigating efforts**
