

To: CLA President

c. Bob Kufrin

Our Town of Sevastopol Clerk/Treasurer, Amy Flok has received phone calls from constituents regarding Frontier broadband construction activity in the Clark Lake area. The Town has been informed that Frontier will be installing broadband (high speed internet) access around Clark Lake. *Frontier's desires to retain their legacy landline customers* and will be offering a competing service to AT&T high speed broadband.

To avoid any confusion, the Town of Sevastopol is under contract with AT&T to deploy high-speed internet to the entire Town of Sevastopol which includes the Clark Lake area. Potentially, some residents in the Clark Lake area may end up with two options for high-speed broadband. Each company may offer different installation options such as underground versus aerial service to the house.

AT&T will be at the Town of Sevastopol Annual Meeting on Tuesday, April 22, 2025 (6pm) to answer any questions you may have regarding deployment as well as the services they will offer. You may also find more information on the Town's website: townofsevastoplwi.gov.

Of course, as a consumer, you may choose whatever service you prefer but we want you to know why this is happening in your area.

If you have any questions, please contact the office at 920.746.1230.

Sevastopol Town Board
